

Zcash Meetups Checklist

1

Decide on the target audience.

Newbies? Users? Developers? Casting a wide net is probably the best choice for most places, but use your best judgment.

2

Set up an information hub.

You need a Meetup.com page, a Facebook page, or some other type of website. People should be able to easily find event details. It's also nice to have RSVP and add-to-calendar functionality. As the organizer, you need a way to contact your meetup members — consider setting up an email newsletter.

3

Tell people about your group.

Make use of social media and your network. Personally invite anyone you know who might be interested. Spread the word on Zcash communication channels:

- forum.zcashcommunity.com
- reddit.com/r/zec
- chat.zcashcommunity.com
- t.me/zcon0

And don't forget Twitter. Tag **@ZcashFoundation** and **@zcashco** so we can amplify you.

4

Plan your first specific meetup.

- Find a venue.
- Decide the focus or topic.
- Decide the date and time.
- Announce the details on your meetup hub.

5

Repeat all of the above on a regular basis!
